

Stop Motion Animation

technique in which objects are physically manipulated in small increments between individually photographed frames

Use Google Chrome to install add-on (free to use):

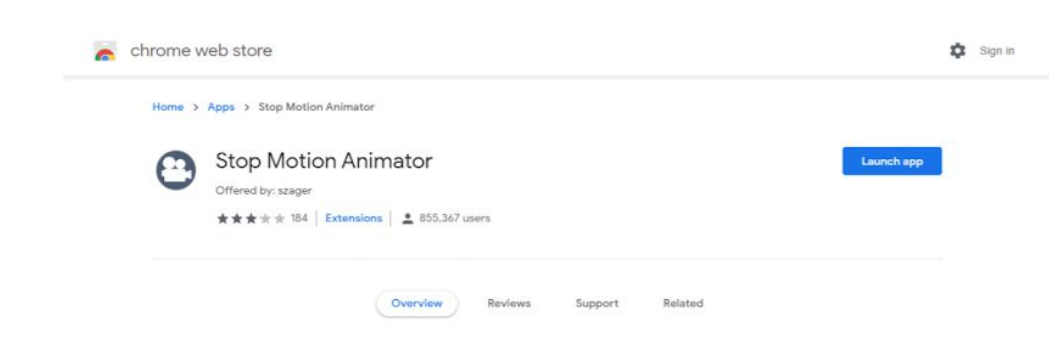

Stop Motion Animator:

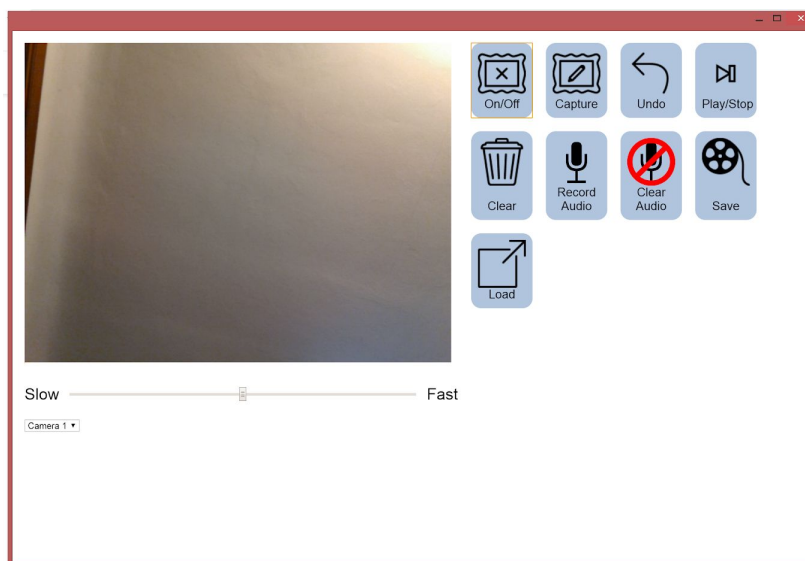

<https://chrome.google.com/webstore/detail/stop-motion-animator/dhgmfcabdnkdbdheInooodefedbilcpho?hl=en-US>

Once installed:

Press blue button, Launch app (pictured below)

Once app is launched, this screen will appear:

Capture: Use this to take a picture

Undo: Delete the previous picture you took

Play/Stop: Play and Stop your animation as you create it

Clear: Deletes entire animation

Record Audio: Records any sounds

Clear Audio: Deletes sounds

Save: Saves the animation to your device

Load: Load a previously created animation from your computer

Slow-Fast bar: Slows down or speeds up animation

Camera 1 / 2: Choose the camera needed to take photographs of your subject

Once saved:

If the animation won't load/play on your device, save animation from device to Google Drive
